[Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Twitter-X](#)

A Python Developer and Transport Technology student passionate about building innovative solutions that bridge technology and transportation systems. Skilled in full-stack web development, data analysis, and automation. Proven ability to develop and deploy production-ready applications using Flask, SQLite, and modern web technologies.

WORK EXPERIENCE

2021-2024

Mathematics Teacher

Ark-Norm Schools

- Developed and implemented comprehensive lesson plans for secondary school mathematics
- Demonstrated strong problem-solving skills and ability to explain complex concepts clearly
- Showcased reliability, dedication, and effective communication skills

TECHNICAL SKILLS

Programming Languages

Python, HTML/CSS

Concepts

Object-Oriented Programming, Database Design, API Integration, Web Scraping, Test Automation, CI/CD Deployment

Frameworks & Libraries

Flask/Jinja2, FastAPI, Tailwind CSS, Pandas, NumPy, Matplotlib, Plotly, Seaborn, Scikit-learn, Bootstrap, Selenium, BeautifulSoup

EDUCATION

2027

BTech in Logistics and Transport Technology

Federal University of Technology, Akure

- Specializing in Transport Planning and Engineering
- Coursework includes Systems Analysis, Logistics Management, Transportation Economics

PROJECTS

PDF2Audio Converter ([GitHub Link](#) | [Live Demo](#))

- Engineered a full-stack web application that converts PDFs and plain text into high-quality MP3 audio files using Google Text-to-Speech (gTTS)
- Implemented PDF text extraction with PyPDF2 and intelligent audio chunking for long documents
- Designed responsive, modern UI with Bootstrap 5 featuring real-time preview playback and direct download
- Deployed on Render with automated CI/CD and persistent session handling
- Tech: Python, Flask, gTTS, PyPDF2, Bootstrap, Render

MyPersonal Bible App ([GitHub Link](#) | [Live Demo](#))

- Developed a serene, user-friendly Bible reading web app with full chapter viewing and powerful search functionality
- Integrated public Bible API to support multiple versions and real-time Scripture retrieval
- Built clean, responsive interface with Bootstrap 5 optimized for mobile and desktop meditation
- Implemented daily verse rotation and book/chapter navigation for spiritual reflection
- Deployed on Render with seamless continuous deployment
- Tech: Python, Flask, Bootstrap, REST APIs, Render

Movie Collection Manager ([GitHub Link](#) | [Live Demo](#))

- Engineered full-stack web application using Flask, Bootstrap, and SQLite with complete CRUD functionality
- Integrated TMDB API for real-time movie discovery and data retrieval
- Deployed on Render cloud platform with persistent database storage and automated CI/CD pipeline
- Tech: Python, Flask, SQLite, Bootstrap, REST APIs, Render

Blog Haven - Full-Stack Blog Platform ([GitHub Link](#) | [Live Demo](#))

Developed and deployed responsive blog application with PostgreSQL database backend

- Implemented user authentication and content management system
- Tech: Python, Flask, PostgreSQL, Bootstrap, Jinja2
- Automation & API Integration Projects,

ISS Overhead Notifier ([GitHub Link](#))

- Built automation system that sends alerts when International Space Station is overhead using API integration

Python Weather Notifier ([GitHub Link](#))

Developed weather alert system integrating OpenWeatherMap API with Twilio SMS notification

CERTIFICATION

The Python Pro Bootcamp | Udemy ([Certificate](#))

- Comprehensive training in Python programming, web development, data science, and automation
- Projects include web applications, game development, and API integration
